

# FIBERGLASS REPAIRS

## VPC'S ON-SITE FIBERGLASS REPAIR SERVICES

VPC Fiberglass can help you maintain your current fiberglass product by offering our maintenance and repair expertise. We routinely perform on-site or at our facility repairs for fiberglass tanks, duct work, and pipe. Our qualified repair specialists are trained in OSHA Safety Standards and Confined Space Entry procedures. VPC repair specialists have repaired fiberglass for food processing, nuclear, industrial, coal burning power, water treatment, chemical, and industrial film processing plants. As experienced fabricators and manufacturers of hundreds of quality fiberglass products, you can rest assured that repairs will be carried out by a thorough, experienced staff. VPC offers free local estimates of repair and is committed to working when you are not to help minimize your downtime.
