

SEWER RATE REDUCTION SYSTEM

SEWER RATE REDUCTION SYSTEM

You can save thousands of dollars on sewer bills just by measuring the amount of water that is released to the sewer. This system offers a bundled solution to begin achieving these savings. This Sewer Rate Reduction System consists of a Fiberglass Metering Manhole with an integral Flume. The Flume is fabricated with pipe stubs, and includes a staff gauge and a stainless steel ultrasonic transducer bracket. The Packaged Metering Manhole is shipped to you completely assembled and ready to install. Also included is the Flow Meter, with transducer and then your choice of Fiberglass Cover to complete the project.

APPLICATIONS

- :: Food Processors
- :: Hotels
- :: Hospitals
- :: Paper Mills
- :: Manufacturers
- :: Car Washes
- :: Laundromats
- :: Large Printers
