

# Gauges

VPC offers a wide range of Staff and Tank Gauges that withstand extreme elements and are guaranteed not to chip, crack, or rust. They are fabricated with modern day materials that offer advanced performance at a reduced cost.

The base material is two sheets of 0.10 thick white polyester painted aluminum with a black thermo plastic core called DiBond. Graphics are solvent ink printed, then top coated with 5 mils of clear polyester optimum chemical, abrasion, and UV protection. Mounting holes (3/16) are provided at strategic points. Staff Gauges can also be adhered to fiberglass backing, PVC or purchased as simply an adhesive backed vinyl gauge. Bold graphics are designed for clarity at greater distance and dimensional lines are flush bottom machines for accurate joining for multi-sectional gauges.

## FEATURES:

- Bold Graphics
- Custom Graphics
- UV Protection
- Non-Corrosive
- Wide Variety of Sizes
- Quick Lead Times
