

Traffic Rated Frame & Cover

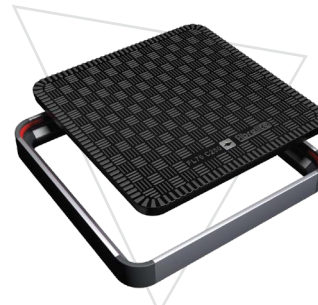

From our all- fiberglass, road-ready, manhole frame and locking cover, to our standard hinged, dome cover, we have the solution for you. Lightweight manhole covers, that do not represent any scrap value, are easy to install and are strong and durable enough to withstand nearly any environment.

VPC 4000
Lockable Cover

VPC 3000
Hinged Lockable Cover

VPFL 76
Square Fibrelite Cover

VPFL 100
Round Fibrelite Cover

Completely secure H-20 traffic rated fiberglass manhole cover and frame, structurally, the fiberglass cover and frame exceeds AASHTO H-20 standards and meets EN 124 Class D400 requirements and can be used on both pre-cast concrete and fiberglass manholes. Unlike the heavy cast iron covers of the past, this manhole cover is lightweight and easy to handle. It offers little interference with radio frequency signals and holds no scrap value. Perfect for the most corrosive settings such as sewer, water, and wastewater among others. Available in numerous sizes!

FEATURES:

Lightweight & Easy to Install
Non- Conductive
